Cool tools - Bolt Lock keyed to your truck

How do you write about a product as simple as the BOLT lock. Or should we say how can you reinvent something as simple as a padlock. The BOLT (breakthrough One-key Lock technology) by STRATTEC is a pretty straight forward product, They are high quality locks from padlocks, hitch locks and cable locks to secure just about anything in your vehicle or anywhere for that matter. What makes it unique is the system uses your vehicle key to set the tumblers inside the lock - matching it to the most common key in your pocket - your cars key. It takes seconds to match the lock to your vehicle. Pull the protective tab off the lock cylinder end, insert your car key twist till it stops and

The locks are shipped with the key opening covered and with the vehicle brand tagged on the lock.

your done. That's it. The best part

is the locks are of excellent quality and even in harsh winter climates the lock I used to secure my car trailer, which was out in the elements for two years, still worked perfectly and was rust free.

The downside was when I sold my truck it made no sense in keeping the lock so it traveled on with the new trucks owner.

Since that time BOLT locks have come along from a simple padlock to a host of products from hitch pin locks to Jeep hood locks, locks to secure your spare tire on the tire carrier and more.

Twist your key as far as it will go and the lock will open. The lock tumblers are now synced with your vehicle key. This can't be changed after the fact so make sure which key your going to use!

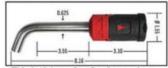

Bolt locks come in an array of products including a 6ft cable lock.

Need to lock up your ball receiver on your trailer?

The lug nut portion can be used on your swing out spare tire carrier on a Jeep or other ½-inch stud tire hold down. The lock portion makes it impossible to get a wrench on the lug nut till its removed.

This lock is perfect for the receiver hitch on your trailer.

You can also swap out your tool bock locks on your storage solutions and key those to your truck as well.
